

CH PRABHU KUMAR

Senior Technical Engineer (UI)

Hyderabad, India • +91 9618723780 • prabhuchira@gmail.com • github.com/prabhuchira • linkedin.com/in/pkumar1999

SUMMARY

- Senior Technical Engineer specializing in UI/Full-Stack development, with 3+ years focused on the Pega platform.
- Proven ability to design and ship internal tools and prototypes that automate UI workflows and enhance engineering productivity.
- Hands-on experience building and debugging customer-facing experiences using React, TypeScript, Node.js, Express, and MongoDB.
- Active practitioner of GenAI/LLM workflows, also recognized with Pega's Hackathon 11 Ken Hackmaster Award for DX Studio innovation.

SKILLS

- **Frontend:** JavaScript, TypeScript, React, CSS, HTML, Material UI, Bootstrap
- **Backend/DB:** Node.js, Express.js, MongoDB
- **Platforms/AI:** Pega (CSA, CSSA, Constellation), LLMs, AI agents, MCP, Vibe Coding (Antigravity, Claude Code)
- **Mobile:** React Native, Flutter/Dart

EXPERIENCE

Pegasystems | Senior Technical Engineer (UI)

April 2025 – Present

- Own end-to-end UI troubleshooting and feature enhancements for enterprise Pega applications used by Fortune 500 customers.
- Built internal tools using React, TypeScript, Node.js, and MongoDB to automate repetitive analysis/triage flows, significantly enhancing engineering productivity.
- Designed and implemented Pega Constellation-based UIs with responsive layouts and critical performance improvements.
- Collaborate with product, engineering, and support teams to reproduce, debug, and resolve complex production issues under tight SLAs.
- Mentor junior engineers and teammates on debugging, tools, and modern JavaScript patterns.

Pegasystems | Technical Solutions Engineer

August 2022 – April 2025

- Implemented and configured Pega-based solutions for large clients, including creating UI rules, integrating APIs, and tuning performance.
- Analyzed and resolved production incidents, collaborating directly with customers and R&D to identify root causes and long-term fixes.

Cognizant Technology Solutions | Programmer Analyst Trainee

October 2021 – August 2022

- Gained hands-on experience in web development, debugging, and enterprise application workflows.
- Supported the development and maintenance of client-facing applications.

Upscale Software Pvt Limited | Full Stack Developer (Part-time)

April 2018 – September 2019

- Contributed to GTrack, a specialized gym tracking application, developing full-stack features (authentication flows, interactive dashboards) using JavaScript, React, Node.js, and MongoDB.
- Managed the complete product lifecycle, partnering on everything from initial requirement gathering and development to rigorous testing and deployment.

AWARDS

- **Pega Hackathon 11 Winner – Ken Stilwell’s Hackmaster Award (DX Studio):** Built low-code tooling for direct publishing of DX Components, a project later productized by Pega.
- **AI Impact Winner:** Recognized for creating a Copilot agent that automated tasks and assisted the team in client meetings and workflows.
- **SPOT Award Winner (2x):** Recognized for rapid learning and efficient resolution of complex client issues, earning direct client accolades.
- **IBM–NASSCOM “Crack the Covid-19 Crisis”:** Team Alpha Clan shortlisted top 15/26,000 for building a crisis response solution.

EDUCATION

- **Bharat Institute of Engineering & Technology** – Bachelor's degree, Computer Science (2017 - 2021)
- **Naagarjuna High School**
